Stage 2 Workflow Testing — Amazon Scraping

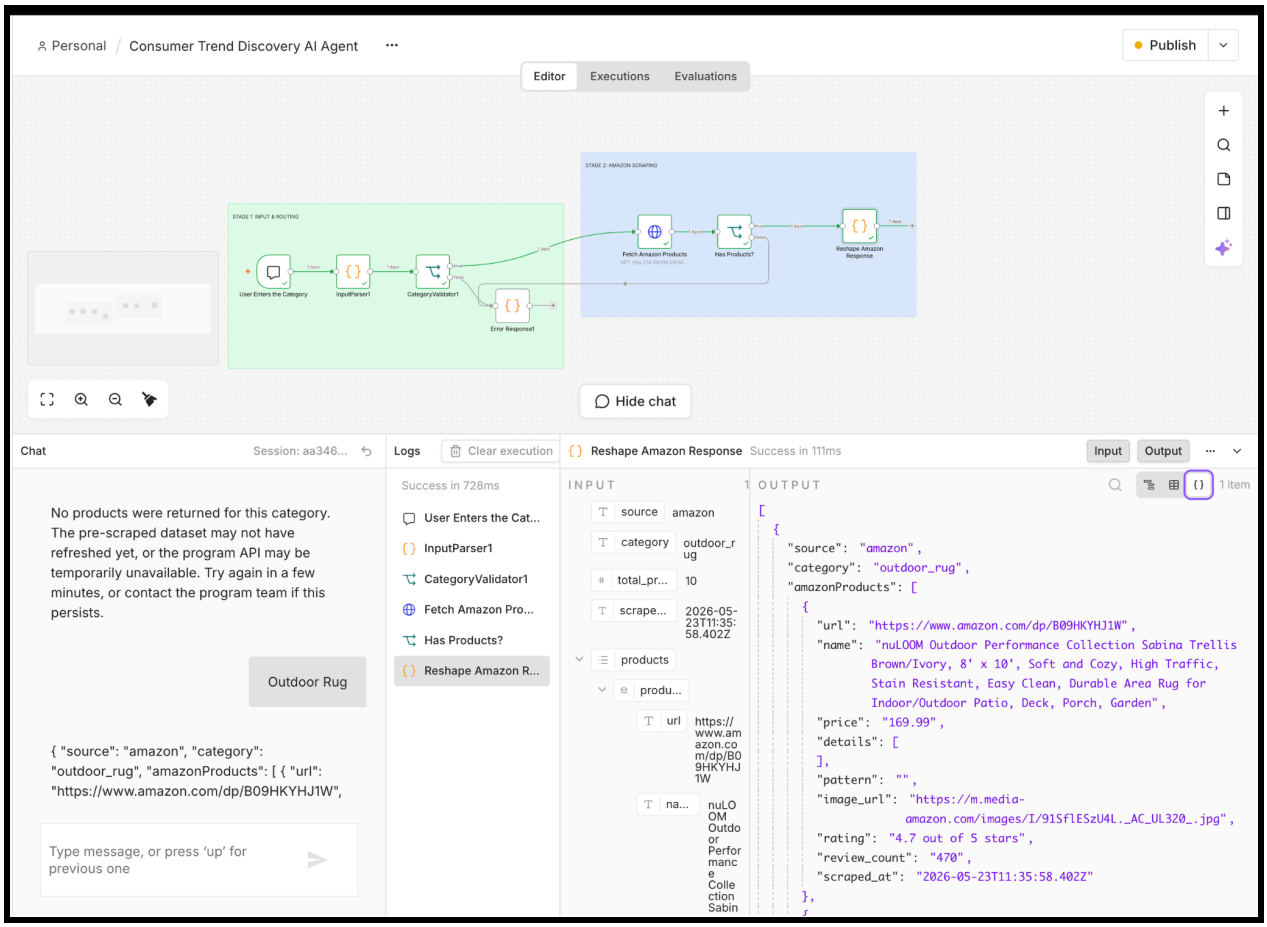

1. Workflow Tested with *(Has Product? Node returning Products)*

Test input: `Outdoor Rug`

Purpose: To verify that the workflow can get the products from Amazon

Evidence: Screenshot of the workflow execution

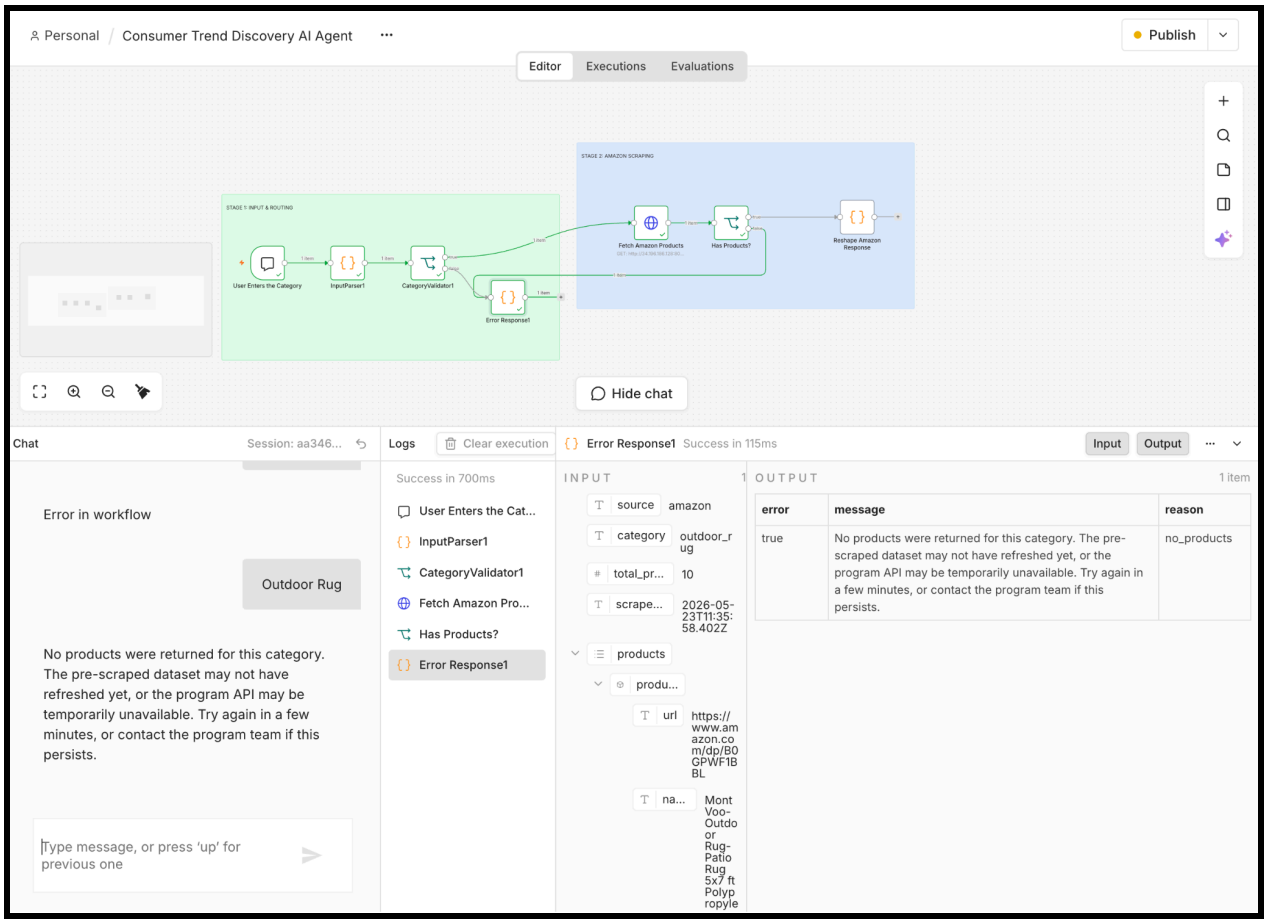

2. Workflow Tested with *(Has Product? Node not returning Products)*

Test input: `Outdoor Rug`

Purpose: To verify how the workflow handles the use case when no products are returned

Evidence: Screenshot of the workflow execution

Reflection

One thing that took extra time was testing no product Scenario. I had to test it without breaking the existing workflow.

Current Status

Stage 2 workflow testing has been completed . Screenshots are included as evidence of the test executions.
